Work Experience

Google - Software Engineer
04.2008-06.2018
Search Infrastructure: search among personal documents (GMail, Drive, ...) or public documents with ACL. I worked on most of the stack: data gathering from other systems, document processing, and serving backends and frontends. I also worked on a framework aiding quality experiments.
Google Maps: Importing and synchronizing between different geo systems inside and outside of Google. Launched maps for new countries and made quality analysis and big scale improvements for maps.

Lufthansa Systems - Software Engineer
10.2006 – 11.2007
Automated schedule optimization for air crew. Big searchspace with complex constraints.

Education

Competitions
1995-2006
I participated in 50-100 contests in Informatics and mathematics. Some examples: I.O.I 2001, ACM (2002-2005), Romanian and Hungarian national contests.
I also organized study groups and made home contests for students.

ELTE Budapest – MSc - Faculty of Computer Science
2001-2007

Ady Endre high school, - Informatics
1993-2001

Skills

Languages: C++, Python, Java, JavaScript, AngularJS and touched code in many others.

Google technologies (large systems, distributed computing, reliability).

Learning: I familiarize myself quickly with new technologies.

Soft skills: Managing projects involving many people to completion. Presentations and tech talks.

Hobbies and Interests
Meditation, playing music, hang gliding.
